Fast Track Onboarding with True Transparency

Fast Track is a low-cost, low-risk way to test pilot Tradeshift, in one or more of your departments and branches, with lightning-fast supplier onboarding results and complete transparency. Fast Track is specifically designed to build up to full rollout. Most e-invoicing companies onboard less than 10-15% of suppliers and that's unacceptable. Tradeshift has recently onboarded 94% of suppliers at 80% of the volume in less than four months.* Our clients have the highest rate of supplier activation in the world.

Tradeshift's Network Engagement Tool ensures onboarding efficiency with optimized campaigns and weekly reports, showing you the number of suppliers joining Tradeshift, and the number of documents you've received. And, it's all automated.

Tradeshift delivers a platform compatible with all of your businesses - open and free to supplier participation. Supplier adoption is through the roof; it's free for them to join Tradeshift and free for them to create and send invoices. Plus, suppliers get 24-hour support.

Revolutionary Invoice Scanning

Fast Track includes Tradeshift's CloudScan™, which makes it free for suppliers to easily scan email and PDF invoices directly into Tradeshift, eliminating the need for manual input. Suppliers validate their own invoices, which increases data quality and frees up time and resources for buyers. True 100% online

Easy Adoption

invoicing is now within reach for every business in the world. Your company is also on the Fast Track to easy adoption with Tradeshift's series of online e-learning videos. It's a simple way to ramp up your organization in next to no time. From Tradeshift fundamentals, to advanced functionalities, to understanding your suppliers' user experience, you'll find it all at your fingertips.

Save Money with Subscription-Based e-Invoicing, No Multi-Year Contracts

Tradeshift introduces subscription-based enterprise e-invoicing, making our advanced enterprise solution available to anyone who wants to use Fast Track to onboard suppliers. No multi-year contracts to sign.
